Cumulative Index

NEED to find something published during 1974 in TEXTILE CHEMIST AND COLORIST? This index can help you locate it quickly either by author or by subject matter.

For example, if you know that the article was written by Carfagno, a check of the INDEX OF AUTHORS shows P. P. Carfagno as the author of Title 2. The INDEX OF TITLES, in turn, identifies Title 2 as "The Effect of Laundering Practices on the Flame Retardance of Fabrics," and shows that it was published 1-25/1 (1=January issue; 25=page number in that issue; 1=continuous pagination for calendar year 1974).

If you don't know who wrote the article, you can still locate it easily by using the KEY TERM INDEX. You know, for example, that the article reports how *laundering* affects fabrics that have been treated for *flammability*. A check of *laundering* and *flammability* in the KEY TERM INDEX shows that Title 2 is identified with each of them.

To make it even easier to locate, Title 2 also carries other key terms—i.e., calcium salts, cellulosic fibers, detergents, flame retardants, modacrylics, nylon. A cross-check between broader, more general key terms (*laundering, flammability*) and more specific key terms (*calcium salts, detergents, nylon*) generally will narrow the search considerably.

For example, the key term *flammability* might offer the titles of a dozen articles; *laundering* might reduce the number to two or three; and *calcium salts* to one.

Or Title 2 may be the only article common to a number of key terms:

Flammability 2,4,8,12,37,44,56,67
Laundering 2,19,27,33,60
Calcium Salts 2,51

Since 2 is the only digit common to all three key terms, Title 2 will provide the information you're seeking.

The complete index for Volume 1 can be found in Vol. 1, No. 27 (December 31, 1969), p87. The complete index for Volume 2 was published in Vol. 2, No. 25 (December 16, 1970), p44. The complete index for Volume 3 was published in Vol. 3, No. 12 (December 1971), p72. The complete index for Volume 4 was published in Vol. 5, No. 1 (January 1973), p82. The index for Volume 5 was published in Vol. 5, No. 12 (December 1973), p58.

The journal is also available on microfilm from University Microfilms, Ann Arbor, Michigan, 48106, and is abstracted by CHEMICAL ABSTRACTS, ENGINEERING INDEX, TEXTILE TECHNOLOGY DIGEST, TITUS (Institut Textile de France) and WORLD TEXTILE ABSTRACTS.
